June 2009

To whom it may concern

We approached Wizard Cleaning in 2007 to tender for our carpet cleaning following a recommendation from another business colleague. We'd had a series of cleaners over the previous few years who had given us both poor service and poor quality results.

From the outset John was both professional and easy to get along with and gave us some excellent advice when discussing our requirements. He subsequently submitted a price that was competitive and has been looking after our property ever since.

John and his team have always been courteous to our staff and customers, flexible so that there is minimal disruption to our business and prepared to go the extra mile for us. We would obviously strongly recommend them to other customers both large and small.

Yours Sincerely

Bevan Ellis

Director
